PROFESSIONAL SUMMARY

Full-Stack Software Developer with 5+ years building and shipping enterprise and web-based software across Windows, Linux, and cloud environments. Core stack spans C++, C#, .NET, WPF (MVVM), Next.js, Laravel, PHP, PostgreSQL, SQL/MySQL, Docker, and AWS. Delivered measurable improvements across fintech (Payraydoo), print automation (Xerox), semiconductor testing (Teradyne), and industrial controls (Shinwa). Track record of reducing manual effort, cutting defect backlogs, and meeting sprint deadlines in Agile/Scrum teams. Open to Full-Stack Developer, Software Engineer, and IT Support roles in the UK.

TECHNICAL SKILLS

Programming Languages: C++, C#, PHP, Python, JavaScript, HTML5, CSS3

Frameworks & Technologies: .NET Framework, WPF (MVVM), ASP.NET, Next.js, Laravel, REST APIs, Tailwind CSS, WordPress, Elementor, Divi

Databases: PostgreSQL, SQL Server, MySQL, Relational Database Design, Query Optimisation, Stored Procedures

Cloud & DevOps: AWS Lightsail, Docker, GitHub Actions, CI/CD Pipelines

Tools & Platforms: JIRA, Git, GitHub, Postman, Visual Studio, Valgrind, UML, IPC, JDF/JMF Protocols

Testing & QA: UAT, Unit Testing, Regression Testing, API Testing (Postman), Defect Triage, Root Cause Analysis, Code Review

Methodologies: Agile, Scrum, SDLC, TDD, Object-Oriented Design (OOD), SEMI E30/E37 GEM Standards

Operating Systems: Windows (7/10/11), Linux (Ubuntu)

PROFESSIONAL EXPERIENCE

Payraydoo — Blythe Valley Park, Solihull

Web Developer

April 2026 – Present

- Develop and maintain full-stack features across the Payraydoo fintech platform using Next.js (frontend) and Laravel/PHP (backend), contributing to 3+ live production releases since joining.
- Engineer user-facing pages and UI components with Next.js and Tailwind CSS, reducing average page render time by 18% through code-splitting and lazy loading optimisations.
- Extend and maintain RESTful API endpoints in Laravel/PHP; validated all API changes via Postman test collections, achieving zero regression failures on 2 consecutive releases.
- Manage PostgreSQL database schema updates, write optimised queries, and execute controlled migrations with zero downtime in production.
- Deploy and maintain application environments on AWS Lightsail using Docker containers; version-controlled all infrastructure changes via GitHub, maintaining a clean CI/CD workflow.
- Collaborate with the product team to align technical implementation with business requirements, translating wireframes into production-ready, responsive CMS-managed pages.

Nu Start Community Enterprise — Brentford, England

Web Developer

June 2025 – March 2026

- Owned front-end development and ongoing maintenance of the company website (HTML5, CSS3, WordPress), achieving ~25% faster page load times through code optimisation and caching.
- Built 3 custom WordPress plugins from scratch, replacing manual admin processes and saving 3+ hours of staff time per week.
- Produced fully responsive, WCAG-accessible layouts using Elementor, Divi, and Beaver Builder, cutting mobile bounce rate by 15%.
- Maintained and tuned MySQL/SQL databases, including indexing and stored procedure optimisation.
- Executed on-page SEO improvements — metadata, schema markup, internal linking — increasing organic search traffic by 20%.
- Upskilled 4 non-technical staff on WordPress content management, reducing inbound support requests by 40%.

HCL Technologies Limited — Chennai, India

Senior Software Developer

August 2022 – January 2026

- Zebra Grogui (C#.NET): Led feature development and defect resolution across 5+ sprint cycles in C#; introduced test suites achieving 95%+ coverage, cutting regression incidents by 30%; enforced code quality standards through structured pull request reviews and JIRA sprint tracking.
- IG-XL / Teradyne (Semiconductor Test): Wrote and optimised analog/DSP test programs in C++ for semiconductor device validation; scripted DLL deployment, cutting release cycle time by 2 hours per build; acted as Level 2 technical escalation point, resolving 10+ device testing issues per month.
- Xerox FreeFlow Core (Print Automation): Designed and shipped workflow modules with JDF/JMF protocol integration, connecting 5+ external print systems; streamlined environment deployment via batch scripts, reducing setup time by 35% and eliminating manual configuration errors.
- Time Sheet Reporting Tool (WPF/MVVM): Single-handedly built a WPF MVVM desktop application for monthly time-tracking reports across 20+ staff; integrated SMTP-based dynamic email generation, eliminating ~10 hours of manual admin per month and cutting report turnaround from 2 days to under 1 hour.
- Shinwa FA Controls (C++/Linux/SEMI Standards): Reverse-engineered proprietary FA control protocols and implemented full SEMI E30/E37 GEM compliance from the ground up; applied IPC, memory profiling via Valgrind, and UML system design — zero memory leaks on delivery; awarded HCL Achievers Award.
- Vehicle Management System (.NET/SQL): Independently engineered a role-based access control (RBAC) vehicle registration platform with full CRUD, input validation, and audit logging across 1,000+ records — delivered on time as a one-person project.

Software Developer

August 2021 – July 2022

- Maintained and extended Xerox FreeFlow Core pipeline modules processing 500+ print jobs daily; diagnosed and resolved recurring pipeline failures, improving overall uptime to 99.5%.
- Delivered job conversion, pre-flight validation, image transformation, and auto-submission features across 4 major releases, cutting job error rates by 20% and reducing customer-reported defects by 25%.
- Restructured legacy batch scripts and introduced process improvements, boosting workflow throughput by 30% and removing the top 3 production bottlenecks identified in quarterly performance reviews.
- Collaborated with UK and US client teams across 3 time zones within 2-week Agile sprints, contributing to on-time delivery of 12 consecutive sprint milestones.

EDUCATION

Bachelor of Information Technology

June 2017 – July 2021

VELTECH University, Chennai, India

- Key modules: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Computer Networks, Operating Systems

CERTIFICATIONS & AWARDS

- C++ Programming Certification
- .NET Development Certification
- HCL Achievers Award — Shinwa FA Controls Project (awarded for full SEMI E30/E37 GEM implementation with zero defects at delivery)
